

AIRCRAFT AS AGENTS OF DESTRUCTION ARE NOT "MAKING GOOD"

Military Experts in U. S. Confess Surprise at Failure of Flying Machines to Live Up to Expectations

BY RALPH SMITH.
WASHINGTON, Oct. 5.—Military authorities in the United States confess to more or less surprise because of the failure of aircraft to come up to popular expectations in the European war. There have been no wholesale destructions in the air, no wholesale destruction of cities or battlefields by the dropping of bombs, nor any of the spectacular results so enthusiastically promised for the ships of the air by their ardent devotees.

This surprise, however, is tempered with considerable relief, for American army and navy officers are a unit in believing the world would be no better by the development of the aeroplane into the terrible engine of destruction which its enthusiastic friends expect. The real work of the aeroplane, it is said, will be told after the war has ended, and at that time too, its place in warfare will be better defined, in the light of present experience. It is the belief of American men that bomb and air conflicts will be found to be of minor importance, and that the real work of the aeroplane will be found, very largely, to scouting and messenger work.

"As added means of reconnaissance, observation and communication," said a high official of the military department, "the aeroplane has been doing a really wonderful work in Europe; but outside of that field its usefulness has not been very great. According to official reports, a dozen or more daily reconnaissance flights of more than 100 miles each, on an average, are being made by the flying machines of the allied nations. It is fair to assume active activity on the part of the air craft of the Germans, without this aerial scouting it would not be possible to carry on a battle line as extensive as the one now being used in Europe."

WHAT MIGHT HAVE BEEN. It is pointed out in this connection that had the aeroplane been developed at the time of the war between Russia and Japan, the great battle of Mukden might have had a different tale to tell. The Mukden battle line was fifty miles long, and the battle lasted for a month, after day, much as the battle of the Marne has already lasted for about two weeks.

The generals on both sides have said many times since that their maneuvers would have been entirely different had they known what was happening along the fifty miles of battle front. But with means of communication excepting those afforded by horses, it was obviously out of the question for any effective reconnaissance work to be done in time to influence corps movements. The Russian generals gave many orders based on information concerning position of enemy which later on proved to be false, and the Japanese generals were misled in similar fashion—all because it was not possible to know promptly what was happening at all points along the front.

But in France, with a battle line running across country for a hundred to three hundred miles, the generals on each side have been at all times in possession of complete and accurate information concerning not only the positions and condition of their own troops but of those of the enemy also. The result has been that both sides have been able at will to move very large bodies of troops back and forth as occasion demanded, and in a general way to operate quite as effectively as if the battle had been on the shorter lines that needed Mukden.

For all this the aeroplane has been directly responsible. It is true that the wireless telegraph has been demonstrating its importance in the European war in a large way, but it is said by military authorities in this country that it has in reality been of rather insignificant service as compared with what has been done by the aeroplane.

It is predicted in this city by men who are in position to speak with authority that the European war will greatly emphasize the importance of wireless and of submarines. Hereafter, it is claimed, all the leading governments of the world will pay more attention to the construction of these military auxiliaries. Both up to now have been compelled to make their way in the face of persistent opposition based on doubt as to their working efficiency, but what has been taking place in Europe has demonstrated that both are needed in large numbers as an important part of the military equipment of every first rate power. It is probable that the American Congress, in the annual appropriation bills to be passed at the session beginning in December, will reflect this improved opinion of the importance of the wireless and the submarine in larger appropriations for their construction. Besides, the world has taken these two modern inventions on faith, but now there has been ample opportunity to justify that faith by works.

It is worth noting that the United States to the present time, has not done a great deal to encourage the development of these military auxiliaries. Officers of the army and navy have been urgently asking for liberal appropriations for years, but without avail. Congress has been content to set aside only small amounts. In the present session, however, it has done a little better, and now, whether it is not difficult to see the aviation corps of the army is to be dealt with more liberally than ever before.

In the past five years it is estimated by the annual reports of the army, that the world has spent \$100,000,000 in the development of aircraft of various kinds. Germany has spent the most, a total of about \$32,000,000, and after her come France, Russia, Austria and England. In the order of the annual appropriation bills of \$100,000,000 in five years, and in the order of such countries as Spain, Brazil, Greece, Bulgaria and Chile. Following is the official table showing

COUNT BERNSTORFF HOLDS CONFERENCE WITH BRYAN

The German Ambassador Gets Copies of U. S. Treaties With Country's Foes

(By Associated Press.)
WASHINGTON, Oct. 5.—Count Bernstorff, the German ambassador, called at the state department today and conferred with Secretary Bryan for half an hour. When he left the ambassador carried copies of the new peace treaties between the United States and Great Britain, France, Russia, China and nearly a score of other countries. Such a treaty was proposed to Germany some time ago.

The ambassador declined to discuss his call. He returned recently from New York and had not seen Secretary Bryan for several weeks.

ing what the world has spent for aviation in five years:

1. Germany.....	\$28,000,000
2. France.....	22,000,000
3. Russia.....	12,000,000
4. Italy.....	8,000,000
5. Austria.....	5,000,000
6. England.....	3,000,000
7. Belgium.....	2,000,000
8. Japan.....	1,500,000
9. Chile.....	700,000
10. Bulgaria.....	600,000
11. Greece.....	500,000
12. Spain.....	500,000
13. Brazil.....	500,000
14. United States.....	300,000
15. Denmark.....	200,000
16. Sweden.....	200,000
17. China.....	200,000
18. Rumania.....	200,000
19. Holland.....	150,000
20. Servia.....	125,000
21. Norway.....	100,000
22. Turkey.....	50,000
23. Mexico.....	50,000
24. Montenegro.....	50,000
25. Cuba.....	40,000
Total.....	\$88,570,000

In addition to the above-mentioned amounts, which were given by the nations as such, there have been private gifts to encourage aviation aggregating \$7,100,000 in the five years mentioned. These subscriptions totaled \$2,600,000 in Germany, \$2,500,000 in France, \$1,000,000 in Italy, and \$100,000 in Russia. The aviation appropriations for 1913 amounted to \$7,000,000 in France, \$5,000,000 in Germany, \$5,000,000 in Russia, \$5,000,000 in England, \$2,100,000 in Italy, \$400,000 in Mexico, and \$125,000 in the United States.

WASHING WON'T RID HEAD OF DANDRUFF

Dissolve It. That's Best Way.

The only sure way to get rid of dandruff is to dissolve it. You don't destroy it entirely. To do this, get about four ounces of ordinary liquid arvon; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the fingers. Do this tonight, and by morning most and three or four more applications will completely dissolve and entirely destroy every single grain of dandruff. It is no matter how much dandruff you may have. You will find, too, that itching and digging of the scalp will stop at once, and your hair will be flaky, lustrous, glossy, silky and soft, and look like a hundred times better. If you want to preserve your hair, do by all means get rid of dandruff, for nothing destroys the hair more quickly than it. It not only starves the hair and makes it fall out, but it makes it stringy, straggly, dull, dry, brittle and lifeless, and everyone notices it. You can get liquid arvon at any drug store. It is inexpensive and never fails to do the work.

FRENCH ARE CONFIDENT OF VICTORY FOR ALLIES

Poincare's Move to Front Tackles to Mean Battle Nears End

(By Associated Press.)
PARIS, Oct. 5.—When the long-drawn battle in the north was resumed today there was a feeling in many quarters that decisive developments were imminent. Consequently, this afternoon's statement of the war office on the battle of the Marne, unique in the history of battles, was awaited with the greatest interest.

While the French realize that the battle has not yet been won, it does not seem to many of them that it is now lost. If the allies win no doubt is felt that they will pay for it, the sacrifice on both sides already being great. The tone of the official communications has furnished the best reason for the hope on the part of the French, although the announcement of the visit of President Poincare to the front was an additional factor for the confidence and optimism felt in regard to the intense struggle. His action is generally commented on as indicating that success is at hand.

Despite the hope of the French the military critic, Lieutenant Colonel Roussel, declares that the battle still can last for some time pointing out that modern encounters last now as long as certain campaigns formerly did. In 1855 the situation was settled in two months, while in 1870 it took thirteen weeks, the fighting after Sedan and Metz being merely a contest for honor. In the furious fighting now going on, Lieutenant Colonel Roussel says, neither adversary can claim what Napoleon called the result.

With the shifting of the battle scenes the railroads are resuming traffic through a number of cities which had been occupied by the Germans. From Epernay the news comes that the Germans respected the vines of Epernay in the important champagne district. Colonel Du Paty De Clam, a celebrity of the Dreyfus case, is among the wounded in Paris.

Czar's Departure to Front Causes Great Enthusiasm

ROME, Via Paris, Oct. 5.—According to a dispatch received here from Petrograd, the departure of Emperor Nicholas for the front has caused great enthusiasm. Patriotic meetings have been held in various towns and villages throughout the empire. While still others had cigarettes in their lips. "An officer stood with his mouth open as if in the act of dictating an order, and all the corpses looked absolutely lifelike."

FUMES OF NEW FRENCH SHELL PETRIFIES ITS VICTIMS IN DEATH POSE

Paris Correspondent Tells Remarkable Story of Deadly Effect of Secret Shell French Are Now Using

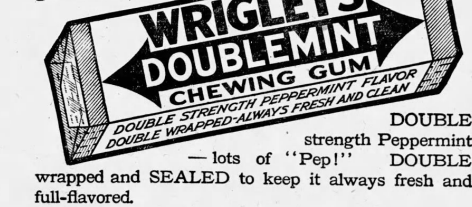

(By Associated Press.)
LONDON, Oct. 5.—Telegraphing from Paris the correspondent of Reuters Telegram company says:

"That the fumes of the famous French three-inch shells have a most deadly effect in an enclosed space is shown by a scene that met the eyes of the French penetrating a chateau occupied by the Germans and which they had just bombarded. Entering the drawing room they found a company of Wurttembergers petrified in action. Some were at the windows taking aim with their fingers still pressing the trigger, while others were at the tables where they had been playing games with cards in their hands."

Bass Dry Goods Co.

REPORTS THAT GERMANS KILLED PRIESTS DENIED

Manifesto Protests Against
"Unceasing Lies About
Warfare of Germany"

BERLIN, Oct. 5.—(By Wireless to Mayville).—According to a statement made by his eminence, Cardinal Bethmann, the highest Roman Catholic authority in Bavaria, the statements appearing in English and American newspapers that priests have been shot and bayoneted by German soldiers while attending the wounded in Belgium are to be considered as absolutely without foundation, says an official report today.

It is also declared that English newspaper correspondents overlook the fact that a large portion of the German army is Roman Catholic.

A manifesto signed by Harnack, Bode, Beerling, Hauptmann, Klinger, Sudermann, Roosenberg, Fickler, Debes, Liszt, Thoma and Wundt and other prominent savants and artists indignantly protests against what is termed "unceasing lies about the pretended barbarous warfare of the Germans."

The leader of the American government commission, sent to Germany on board the cruiser Tennessee, has addressed a letter to Franz von Mercklin, and the German-American relief committee highly praising the German nation in America for its generous and unflinching proof of kindness.

Russia is issuing \$125,000,000 unsecured notes.

The return of the German Imperial bank last week shows \$429,000,000 in specie, which is \$10,500,000 more than in the previous return.

BRITAIN OR GERMANY? IRISHMEN MUST DECIDE

John Redmond Puts Question
Plainly to His Countrymen
in Recruiting Speeches

LONDON, Oct. 5.—(By Associated Press).—John Redmond, the Irish leader, in making recruiting speeches at Vexford Sunday, appealing for re-consideration on the home rule question, he said:

"I will meet Andrew Bonar Law (the opposition leader) in parliament by sentences and by reason. I may with my heart and soul that not a single Irishman who is a blessed result may come to Ireland, and that not a single Catholic, by Protestant and North of Ireland, Irishmen by south of Ireland, Irishmen, it may prove to be a sign of the future unity of our island, in the hands of all the liberties we have won, but not it is our plain duty to do so. Both the South African premier did in his speech. Are you for Britain or Germany? Are you for Britain or Germany?"

"Believe me, we cannot remain aloof."

POSITION OF GERMANS ON MEUSE VERY UNFAVORABLE

French Troops Are Making
Steady Advances Towards
the Enemy's Rear

(By Associated Press).
LONDON, Oct. 5.—A Bordeaux dispatch to the Times says:

"The Germans soon may have cause to regret the success of the movement which carried them to St. Mihiel and the banks of the Meuse. While their engineers are making unavailing efforts to bridge the river again, the French are working step by step towards their rear."

"The balance of days and nights of exhaustion, in drugging, in the pushing of bayonet charges, gallant cavalry actions and obstinate hand-to-hand fighting is about to be struck. France awaits the end of the three weeks struggle with confidence, while casting an eye upon AUBREY."

DRUGGING THE EYES

Drugging the pupils does not insure correct fitting glasses, eye glasses are fitted by modern druggists, opticians, optometrists, ophthalmologists, and others.

RAILWAYS GREAT AID TO THE ALLIED ARMY

Allies Move Armies With Great
Rapidity in Northern
France

(By Associated Press).
LONDON, Oct. 5.—The Times at Bordeaux, commenting on the time in northern France, says:

"The time has not yet come to reveal the composition of the allies' left wing, but it is now striking up toward the Belgian frontier but where the veil hiding the movement in the neighborhood of Antwerp is drawn away it will be seen that the potent factor the French railway service has been in the battles of northern France."

BATTLESHIP MINNESOTA ON JOURNEY TO MEXICO

Bunkers Full and She Has
Stores Enough to Last
Six Months

(By Associated Press).
PHILADELPHIA, Oct. 5.—The battleship Minnesota, flagship of the fourth division of the U. S. fleet, left Philadelphia for the Philadelphia navy yard yesterday for Mexican waters. The vessel has been at the navy yard about a week undergoing repairs. When she sailed her bunkers were full and she had aboard sufficient stores to last six months.

RUSSIANS STILL HOLD HEIGHTS OF PRYEMYSL

Several Attempts of Austrians
to Retake Positions
Fail

(By Associated Press).
LONDON, Oct. 5.—A dispatch from Petrograd to the Central News states that a member of the Russian Duma, who has just returned from Galicia, declares the Russians captured the heights and five miles from Pryemyshl and that the Austrians have vainly attempted to retake them.

WAR WILL INCREASE EUROPE'S DEMAND FOR THE AMERICAN HORSE

Farmer of U. S. Can Profit by
Breeding Good Horses For
Export Next Few Years For
Foreign Market

BY RALPH SMITH.
WASHINGTON, Oct. 5.—During the next decade there will probably be an increased demand for American horses in the countries now engaged in the European war. The demand may even continue much longer, according to investigators of the U. S. department of agriculture, as not only will horses be needed for armies, but when peace is restored, more will be needed for agriculture. Already European agents are said to be endeavoring to purchase horses in this country and Canada, and there is an increased interest in many sections in horse breeding.

To meet this increased European demand American farmers may well endeavor to raise well-bred horses, although the department of agriculture does not advise them to purchase a surplus of horses for export.

It merely advises that ordinary farm work should be done whenever possible by good men and horses, and that to good stallions, in the course of seven years' time enough for the bulk of demand. American will be over 300,000 horses bought here by the British government, which will be doing a large foreign government could now obtain a similar supply in this country, except at excessive cost.

However, it is farmers take pains to utilize their stock during the winter by turning them to good stallions, in the course of seven years' time enough for the bulk of demand. American will be over 300,000 horses bought here by the British government, which will be doing a large foreign government could now obtain a similar supply in this country, except at excessive cost.

However, it is farmers take pains to utilize their stock during the winter by turning them to good stallions, in the course of seven years' time enough for the bulk of demand. American will be over 300,000 horses bought here by the British government, which will be doing a large foreign government could now obtain a similar supply in this country, except at excessive cost.

It is natural that European countries, as next to Russia it has more of these animals than any other country in the world. The United States has only 10 per cent of the world's horse stock, but it is doing a large foreign government could now obtain a similar supply in this country, except at excessive cost.

The German army requires for a com-

plete mobilization 750,000 horses and the French army is said to require 250,000, which figure, however, probably includes only those for the cavalry. It is conservatively estimated on good authority that 1,000,000 horses are now engaged in the European war. As the great majority of these horses are not included in the permanent military establishment, but are used for farm work and are requisitioned by governments during the war, the demand for horses in the countries of continental Europe will certainly face an acute shortage of farm horses, but even so, the price of horses will seriously affect the price of horses the world over, as soon as peace is declared.

The rapidness of demand of horses in war is illustrated by figures from our own civil conflict. During the Shenandoah Valley campaign, Sheridan was supplied with fresh horses at the rate of 150 per day. In his report for the year 1865, the quartermaster general of the United States army stated: "The service of a cavalry horse under an enterprising commander has averaged only four months." During that time they were 500 horses consumed per day in the northern army, without considering those captured and not reported. During eight months of that year the cavalry of the army of the Potomac removed 200,000 horses, nearly 40,000 horses in all being required.

MANY HORSES USED.
Our own army furnishes a desirable market for well-bred horses, there being under the remount system at least 5,000 horses required annually to supply both the army and the national guard. There are now about 20,000 horses in our regular army on a peace basis. In war, many more would be required before the first engagement. There is, therefore, a steady market for good stock ready to hand, and for breeding to breed high class horses. As the war has advanced along with other commodities during recent years, the price of horses has advanced.

The bureau of animal industry of the department of agriculture at Washington, which is the best authority on the subject of horse breeding, has advanced along with other commodities during recent years, the price of horses has advanced. There are certain localities more suited to horse breeding than others and places where certain breeds are better. Such data may be obtained for the asking, and the bureau of animal industry is at the service of the farmer. It is not to the extent that it is used here.

WASHINGTON, Oct. 5.—A bill to enable cotton owners to borrow money on warehouse receipts was introduced in the house today by Representative Adamson, of Georgia. It provides that any national or state bank which shall within sixty days lend to the owner of cotton produced by himself or on his land not more than three-fourths of its market value may at any time before the maturity of the borrower's note deposit the note and the warehouse receipt with the treasury and be refunded out of any money not otherwise appropriated. The note would be to mature one year after date and bear interest at the legal rate rate.

When the note is finally paid the bank would receive as compensation one-third of the interest collected.

WASHINGTON, Oct. 5.—Although the Chinese authorities continue to hope that the Japanese will permit them a measure of control over the Shan-Tsin railroad, they have informed the British and the International Irrigation congress at Calcutta, Canada.

ADAMSON OFFERS BILL TO AID COTTON CROWERS

Measure Would Enable Them
to Borrow Money on
Warehouse Receipts

WASHINGTON, Oct. 5.—A bill to enable cotton owners to borrow money on warehouse receipts was introduced in the house today by Representative Adamson, of Georgia. It provides that any national or state bank which shall within sixty days lend to the owner of cotton produced by himself or on his land not more than three-fourths of its market value may at any time before the maturity of the borrower's note deposit the note and the warehouse receipt with the treasury and be refunded out of any money not otherwise appropriated. The note would be to mature one year after date and bear interest at the legal rate rate.

When the note is finally paid the bank would receive as compensation one-third of the interest collected.

JAPS REPULSE ATTACK MADE BY THE GERMANS

(By Associated Press).
TOKIO, Oct. 5.—It is officially announced that the German infantry at Tientsin delivered a surprise night attack against the Japanese, but were repulsed. The Germans had forty-eight killed and the Japanese five killed and eight wounded.

The commanding on land and sea in the vicinity of Tientsin continues. Four Japanese shells hit the German gunboat Lint, which retired to the inner harbor after the exchange of shots.

HUSBAND FORCED WIFE TO WORK ON FARM, IS CHARGE

Toiled for Ten Years One of Many Allegations in Divorce Suit

That he forced her to work for ten years as a common laborer on a rugged North Carolina farm where she fell daily from her head of cattle the winter her child was born, that he refused to let her visit her mother on his death bed, while he himself traveled luxuriously in the mountains, are some of the allegations charged against W. H. Greenwood in the superior court Saturday.

The suit was filed by Attorney T. R. Haden in the name of the wife, Mrs. O. K. Greenwood. At the same time a writ of ne exeat was taken out, under which Greenwood was arrested last Saturday night at the Princeton hotel, and is being held in the county jail, where he made \$300 bond.

Mrs. Greenwood asks temporary and permanent alimony in the suit, the custody of her children, three boys, aged 17, 12 and 6, and two girls, aged 15 and 10, and an injunction to keep Greenwood from disposing of his property.

Judge George L. Bell granted the injunction and set October 17 as the date for hearing the divorce petition.

Mrs. Greenwood says her husband is a wealthy man, owning 5,000 acres of land in Rabun county and 1,500 acres in Habersham county, with an income of eight a year as a commercial traveler.

She says that they were married November 21, 1905, at Franklin, N. C., and that Greenwood deserted her February 1911 for his wife's support for her and her children, she says, is the rent from a cottage in Corvallis, Ga. She alleges that she and her children are destitute.

Several sensational allegations are made in the suit. The North Carolina farm, which they moved upon after marriage, is described as rugged, rocky property, where for ten years Mrs. Greenwood toiled in the fields with her husband taking all the earnings of the farm and traveling the country over in luxury.

As a result of her hard labor and meager diet of the winter she was forced to feed cattle while awaiting the birth of a child. Mrs. Greenwood asserts that she contracted tuberculosis and had to go west. She says that she went to a hospital and was operated on, but that Greenwood refused to pay the expenses and instead inflicted the death of Mrs. Greenwood's brother-in-law, although this occurred at the home of her husband, and a short distance away, Mrs. Greenwood declares that her husband refused to allow her to look after her brother, although he knew that her brother had tuberculosis and that his hours were numbered. She claims that she managed to get to the funeral by slipping away after her husband went to the road.

Later, after the suit, Greenwood accused his wife of infidelity, and in the presence of their son, and went to a hotel to see for divorce on this ground in Alabama, naming an Oklahoma man as respondent. His allegations in this suit and in another he is said to have filed in Habersham county, Mrs. Greenwood holds as absolutely untrue.

VICTOR COMPANY TAKES 2,000 BALES OF 10-CENT COTTON
(Continued from First Page.)

ing, and the above filled in state, to a right draft upon us for the use of the cotton, and present name to your bank for collection.

We ask you to exercise your judgment, as our investment, and the very large number of Victor dealers throughout the south, will accept a great many thousands of bales.

Yours very truly,
VICTOR TALKING MACHINE CO.,
By Louis F. Gieseler, General Manager.

DEALERS BLANK
The blank enclosed in the letter to each dealer, which is to be filled out and sent to the company, reads as follows:

Victor Talking Machine Company,
Cincinnati, O. J.

I, the undersigned, in your letter of instructions of October 1, I have received one bale of compressed cotton for your account and hereby certify, to the best of my knowledge and belief, the bale weighs _____ pounds, and contains _____ bales of cotton, and for each bale I enclose in cents per pound, as per state draft and full of ledger herewith attached.

Yours very truly,
(Victor Dealer.)

MURPHY COMPANY BUYERS
That the Murphy Company, of New York, N. Y., has joined the buy-ers' association, and has agreed to purchase 200 bales of distress cotton at 10 cents a pound, is the announcement made by G. W. Nicholson, the Atlanta representative of the company.

The company's purchase is the first of the kind, and it is expected that it will be distributed over the south through its representatives. In the same way that other large purchases in northern concerns have been distributed.

COTTON COMPANY PURCHASE
The Steeling Clothing company, of Philadelphia, is one of the oldest and largest clothing manufacturers in the United States. Since the buy-bale plan was started it has received requests from its dealers throughout the south asking the company to buy a bale of cotton at 10 cents a pound, and the company has responded by buying 200 bales through each dealer who has made the request. The total amount aggregating 100 or more bales, the company expects to buy still more cotton through its dealers.

Whereas, the financial base of the company is in Atlanta on through the south to look into better conditions. It is stated that the company is in full sympathy with the movement, and that it has been accomplished a great deal of work in the south in the unfavorable situation caused by the European war.

SMALLEST BALE IN DIXIE AND ITS TINY MISTRESS

A LITTLE COTTON QUEEN

Miss Elizabeth Catherine Leopold, three-year-old granddaughter of Dr. Henry Bak, of 575 Washington street, who has bought her bale. It is just the right size, weighs fifty pounds, and is hollowed out so that she can stand upright inside and peep over the top.

LIST OF DOG SHOW PREMIUMS ANNOUNCED

Array of Awards Offered This Year More Attractive Than Ever Before

The list of premiums and trophies to be given winners at the dog show of the Atlanta Kennel club, to be held under American Kennel club rules at the auditorium Monday, Tuesday and Wednesday of next week, is announced today by officers of the Atlanta club.

There are the usual ribbon awards, a series of cups given by the Atlanta club as special prizes, gold medals given by the Atlanta club and the national organization have offered cups and numerous other prizes are offered by firms and individuals from all over the country.

By far the largest and most coveted array of premiums is offered than has ever been given at a dog show. Dealers from all parts of the United States have contributed, and a number of local merchants also. Among the latter who are giving prizes are: Law Brothers, Elmer's down suits, Carlton Shoe and Clothing company, Hirsch Brothers, Dixie Seed company, Parke-Chambers-Hardwick company, Cloud-Stanford company, Meyer Reizenstein, Nunnally company, Goldin Hardware company, King Hardware company, Silvers & Roth, Hightower Hardware company, Rothman Book Concern.

Champion Walker Will Preach Peace on Hike Atlanta to Washington

A peace tour afoot from Atlanta to Washington has been organized by "Bill" Harris, of Philadelphia, a well known tramp who has walked from Salt Lake City through Death Valley down into Texas, from Chicago to Toronto, Canada, and over many other portions of the United States.

All the way to Washington Bill will push ahead of him a cart, with flags and portraits of the world's rulers, loaded with peace slogans, with Wilson's proclamation and with peace postal cards.

He leaves here Tuesday at noon, going straight out on the Rockford road following the Journal-Herald national highway all the way to Washington.

Women Urged to Buy Cotton Goods and Meet South's Pressing Need

Make This Cotton Goods Week, is Appeal of Mrs. Percy V. Pennybacker, President of Federation of Women's Clubs

Today is the dawn of a new fashion, built on Dixie's fleecy staple. Women all over America this week will buy cotton material for their own wear.

The south calls on its patriotic women to show how valiantly they can meet an emergency and do more than their sisters of the north, east and west.

The appeal of a woman to women to do their part to help the south as only women can, has been made by Mrs. Percy V. Pennybacker, president of the Federation of Women's clubs. Mrs. Pennybacker begs all noble women of America to make this week a week in which to buy cotton goods.

The Journal records Mrs. Pennybacker's motion: "We appeal to the women of Georgia to go to the stores this week and buy all the cotton goods you can use and that your pocketbook affords."

"We ask you to do this out of the patriotism—out of the love in your heart for your south."

ALL CAN RESPOND.
The appeal of Mrs. Pennybacker is one which southern women above all others may respond to most easily. It is an appeal to save the south, and as Mrs. Charles J. Haden, wife of the president of the Georgia chamber of commerce, points out, the climate enables southern women to adapt themselves to the new fashion of wearing cotton more easily than women in any other part of the country.

"We can use cotton goods all winter without discomfit, while women of the north can't," said Mrs. Haden. "It is up to Georgia and the south to do more than any other section."

Women of the south should realize that today an emergency confronts the United States and more particularly the southern states. The war has made it impossible to sell this year's cotton crop in Europe, which continent takes the bulk of it every year.

This appeals directly to business and to a million homes in the south. The war has brought disaster to the textile mills of the country. Cotton goods can't be sold in Europe, and at war, and 2,000,000 workers in America are threatened with unemployment this winter.

UNITED STATES DEMAND.
That is why the salvation of the hour is to create a demand for cotton. That is why the duty of the hour is to buy cotton goods as lavishly as we can afford, and make work for those 2,000,000.

If enough patriotic women do this, those same mills will be forced to come south to buy raw cotton. So even a woman's worth of cotton goods bought will help the 2,000,000 workers threatened with starvation and also the cotton planters of the south and incidentally every other person in Atlanta and Georgia.

The women can make sure there will be no panic in this land of love. Right here in Atlanta every penny spent for cotton goods will do its part toward improving the business and industrial relations.

This is the buy-cotton-goods week. Let the men "buy a bale of cotton."

Let the men "buy a bale of cotton."

Let the men "buy a bale of cotton."

Let the men "buy a bale of cotton."

Let the men "buy a bale of cotton."

Let the men "buy a bale of cotton."

Let the men "buy a bale of cotton."

Let the men "buy a bale of cotton."

Let the men "buy a bale of cotton."

J. C. BLOUNT DIES AT HOME OF MOTHER AT HADDOCK

Was Prominent Washington Lawyer and Widely Known in Georgia

HADDOCK, Ga., Oct. 5.—Joseph Gray Blount, prominent lawyer of Washington, D. C., died early this morning at the home of his mother Mrs. James J. Blount, near here.

Mr. Blount was fifty years of age, eldest son of the late James F. Blount, one of the most prominent men of Georgia in ante-bellum days. He was reared in Macon and was a graduate of Mercer university.

Mr. Blount was a brother of Mrs. W. D. Lamar, state president of the United Daughters of the Confederacy, and of John John P. Rose, of the Macon circuit.

Let's make the dry cotton stores hum! Let's buy our winter supply now. Let's buy cotton goods for every household want!

This is the time when something which really is "just as good," meaning cotton, can be substituted for silk frocks, linen handkerchiefs, silk stockings and kid gloves.

Women are the retail buyers of the world! Women are the rulers of fashion! That's why cotton goods are going to be the real fashion now. Let every southern woman help her country and exercise her privilege to make King Cotton a real king in the land of his birth and save the day. Help the south by keeping in the "newest fashion!"

Let every southern woman help her country and exercise her privilege to make King Cotton a real king in the land of his birth and save the day. Help the south by keeping in the "newest fashion!"

We will buy a pound of Cotton for every pound of Tobacco we sell

We realize, with all the residents of the South, the present financial stringency due to the cotton situation. We realize that the South must sell its cotton, and we will help in the most practical way we know—by buying cotton.

For every pound purchased of all of these famous, popular brands of tobacco and cigarettes (counting 1,000 cigarettes equal to five pounds of tobacco) we will buy from our dealers a pound of cotton at 10c, in accordance with our circular to dealers dated Sept. 28.

We have faith in cotton. We know that when the war clouds roll away, the demand of the manufacturers for cotton throughout the world will be greater than ever before, and the South will enjoy unprecedented prosperity.

RED TOBACCO
PENN'S
TOBACCO
SOVEREIGN
CIGARETTES

The man who chews RED J gets absolutely the best 10-cent plug tobacco of this character in the world. Made of old and mellowed leaf—a tough and lasting chew.

PENN'S is guaranteed to be the best Natural Leaf Tobacco made—sweet, mellow and satisfying. Any dissatisfied customer can return it to any merchant, whom we hereby authorize to return his money.

University of Virginia To Take Cotton for Fees (Special Dispatch To The Journal.)

CHARLOTTESVILLE, Va., Oct. 5.—The board of visitors of the University of Virginia has officially adopted a plan to cooperate with the buy-bale plan and will receive in lieu of tuition fees United States warehouse certificates of cotton in payment of all university fees. The cotton will receive the same price as the European 10 cents per pound. This plan was adopted at a meeting of the board the latter part of last week and has just been officially given out.

The officials recall that the attendance of the cotton belt states was affected by the cotton crisis, and it is their desire to remedy this as much as possible. While as yet the complete details of the plan have not been made public, the plan is being sold in Atlanta by the University of Virginia.

It is stated that they would be drawn along the lines of similar plans of the Georgia colleges that had adopted the movement.

ST. CAR CO. ASKS TO STOP EXTRAS ON THREE LINES

Patronage Does Not Justify Continuance of Service, It Is Stated

Petition for authority to discontinue "trippers" or extra cars now operated during the morning and afternoon rush hours on parts of three of the Georgia Railway and Power company's routes, was filed Monday with the railroad commission by that company. The routes specified are the South Pryor and West Peachtree line, the Orin street and Magnolia street line and the Pine street-Woodward avenue line. The company's argument, as set forth in the petition, is that the traffic and gross receipts on these lines has decreased so steadily during the past several months as to make the extra work unreasonable and to leave the straight schedule service ample for the needs of its patrons. Figures showing the decrease and statistics of special trips made by observers are submitted with the petition.

NORTH ALASKAN COAST CHARTED BY ONE MAN

California Completes Work Accomplished Alone In One Year's Time

(By Associated Press.)
SAN FRANCISCO, Oct. 5.—Charting of the North Alaskan coast has been completed by Ernest DeKoven Leflewell, after a year alone in the northern wastes. It was learned here Monday that Leflewell arrived last yesterday on the steamer Jeannette, its journey north on the Mary Sachs, one of Stefansson's vessels, and returned with the word that two ships of the Canadian expedition which were frozen in last winter near Etahman Sound, three miles from Leflewell's headquarters, made their way to sea in July and now are on their way to Pomorie waters.

ONE KILLED, ONE INJURED BY THIEVES IN THEATER

Special Officer Prevents Robbery of New York Playhouse, But Loses Life

(By Associated Press.)
NEW YORK, Oct. 5.—Harry P. Simmonds, a special police officer, was killed and Louis Blankenberg, injured today by two men Simmonds came upon the engine room of an East Fourth street theater, where he and Blankenberg were employed. Simmonds was shot twice and stabbed eleven times and Blankenberg, who ran to his assistance, was rendered unconscious by a blow on the head. The thieves, who escaped through a coal hole, are believed by the police to have been surprised by Simmonds while attempting to reach the box office, which were the Saturday night and Sunday receipts.

WASHINGTON, Oct. 5.—Senator Smith, Mrs. Smith and their daughter, Miss Collette, left Washington last night for Atlanta.

BELIEVING DEATH NEAR

Clerk Confesses Theft

Young Man Shot Trying to Get Away With \$20,000 Will Live to Stand Trial

NEW YORK, Oct. 5.—Physicians said last night that Herbert Eaton, the young clerk who, thinking he was on his death bed, confessed, according to the police, to having stolen about \$20,000, will live to stand trial. Saturday it was thought Eaton had only a few days to live. He was shot by detectives while trying to escape.

MOVIE ACTORS HELD IN REAL MYSTERY RELEASED

(By Associated Press.)
RIVERDALE, Cal., Oct. 5.—An open verdict by a coroner's jury on the death of Fannie Curdand, a motion picture actress, whose body was found three days ago in an unattended ranch house, led to the release today of George Garfield, Ray Kille and Frankie Huffman Lang. Wandering statements by Mrs. Lang under the influence of an anesthetic while wounds in her head were being dressed, led to the discovery of Fannie Curdand's body. Mrs. Lang said she killed the girl, but on recovering consciousness declared that Garfield maintained that the girl committed suicide. Those held were working with a movie company.

Mrs. J. A. Floyd Dies (Special Dispatch to The Journal.)

SOROSIS SERVICE

Shoes for Women and Children

ONLY AN ADVERTISEMENT

But you will not begrudge the time spent in reading it. Don't miss a word. Read slowly and learn how prosaic shoemaking and humdrum shoe-selling have been lifted into the realm of art.

The **SOROSIS ROOM** is a definite and emphatic relief—delightfully retired, restful, spacious and gratefully social in its silent silvery grayish tones.

When a woman enters the **SOROSIS ROOM** she is conscious of a sense of solace, of confidence, of mental, muscular and nervous relaxation. She easily yields to the atmosphere of calm and surrenders to the agreeable and unobtrusive savor of genuine hospitality that is as pervasive as a cordial personality or a refined perfume.

After surveying and assaying Shoe-dom from blue-stockinged Boston to silk-hosed Butte, we feel sure of having infused the breath of life into a new standard, of having created a new precedent, of having poured fresh force and inspiration into a branch of business that was sterile of originality and arid of human interest.

SOROSIS SYSTEM represents the acme of endeavor to establish a sympathetic and co-operative bond between seller and buyer. We knew that such a *motif* would be rich with potentialities.

Ardent art, heart and imagination—a sincere desire really to *serve* controls every part of the enterprise.

We have heeded the promptings of **RECIPROCITY** and **MUTUALITY**—two elements of progressive and constructive business thought.

We have not discovered a new law—but have simply applied an old one that had atrophied by **DISUSE**.

Our **SOROSIS** plans sparkle with altruistic economic ethics. Succinctly stated: *We hope to prosper ourselves by bestowing matchless values and ideal satisfaction upon the individual—and hence upon the mass.*

We have developed a systemless **SYSTEM**. It takes into account the *human equation*. We have gone back to first principles—and the initial step in that direction is the large and intense recognition of the men and women who work with us.

Efficiency engineers, in frantic attempts to eliminate "lost motion" have well-nigh denatured the human equation. We believe the general tendency to turn men and women into machines is wholly wrong. Personality still counts—and the retailers who have red-taped their methods regardlessly, under the mistaken notion that it means economy, will ultimately let spirit and temperament—and the strength as well as the weakness of sentient beings prevail.

The **SOROSIS** policy is a protest against over-systematization—that illiberal, crushing, meagre intent to ignore individual talent, to check individual aspiration, to discourage individual intelligence, to repress individual growth and subject *everyone* to the same cold, exact, rigid action of the inanimate.

SOROSIS SHOES are the products of manual skill and intellectual efficiency.

They are made by talented and conscientious craftsmen—who do their best.

And according to the manufacturer's idea, one's best is not measured by quantity—but by excellence.

You don't pay a lawyer by the number and length of his clauses. You pay him for his *knowledge of law*.

Workers on **SOROSIS SHOES** are not paid for the number of shoes they make—but for the way they make them.

By this means the manufacturers secure good *individual* service, because the workers apply their minds entirely to the work itself, without hurrying or rushing to *pile up volume*.

They are not "sweated" nor driven at high pressure. They are not ruthlessly prodded to excessive effort, costing them the loss of enthusiasm and the manufacturers the lowering of their standard.

The men and women who make **SOROSIS SHOES** are not subjected to stop-watch observations for the purpose of stimulating their activity. They *know* how to handle materials and machinery in order to gain *accuracy and celerity*.

Quantitative testing, as recommended by "scientific management," may achieve enormous technical economies in some lines of manufacturing, but we don't believe its speeding-up process—consuming, as it does, the muscular

and nervous energy of the workers—can be advantageously applied to such articles for personal use and adornment as **SOROSIS SHOES**.

The "chart and stop-watch" system may be all right for trench diggers, bricklayers, coal heavers and shovelers, but it cannot add an iota to the usefulness of the maker of a fine watch, an exquisite gown, or an artistic shoe.

The **SOROSIS** craftsmen are not servants of tools and machinery—they are not the automatic vassals of routine. Their training is quite different. The manufacturers develop their personal sense of efficiency by encouraging them to exercise their initiative, their judgment, their intelligence and liberty of action. Hence they fit into their jobs by the powers of ideas, imagination, ability and discrimination. They have responsibilities and obligations—and they meet them.

Because the **SOROSIS** organization is not made up of dull, docile people, doing their tasks like stupid, phlegmatic oxen—the output of **SOROSIS SHOES** is limited.

From first to last, each **SOROSIS SHOE** passes through one hundred skilled hands before reaching the retail buyer.

No "short-cut" method is practiced. Every **SOROSIS SHOE** remains on the last twenty-eight days. This thoroughness explains the permanence of the **SOROSIS** shapeliness.

Shoes, less carefully made, and the market abounds with them, are taken from the last in seven or eight days. These go to the retailers, green, and cannot yield satisfaction to the wearer.

SOROSIS SHOES are well-seasoned and retain their original grace to the very end.

The salespeople at the Glove counter are not more careful and painstaking in their effort to fit your hand than the salespeople in the **SOROSIS ROOM** are to fit your **FEET**. They realize the importance of selling you shoes that fit with exactness and nicety—and regard the reverse as a reflection upon their skill and taste.

In fitting feet, our people do not descend to the low expediency and base makeshift of "heel-pads." These subtleties are used only by amateurs and bunglers.

Owing to the way **SOROSIS SHOES** are *lasted, stayed and seasoned* they do not stretch—but hold their shape.

Why do we devote so much attention to fitting? Because fifty per cent of the just claims recorded for unsatisfactory wear may be traced to improper fitting. For example: When a shoe hurts, the wearer cannot walk true, therefore, undue strain is felt at certain points, and the weight of the wearer is not correctly distributed—not balanced or equalized. Consequently, this over-pressure at a given point, breaks the upper.

When a woman visits the **SOROSIS ROOM** she isn't asked: "What size do you wear?" **SOROSIS** etiquette forbids it. It is our observance of just such seeming trifles that creates the **SOROSIS** atmosphere.

Some women and children, owing to a peculiarity of mal-formation of foot or ankle, can't wear the usual **SOROSIS** models.

For all such, we are glad to make special shoes to their individual measurement *at low prices*. And remember, even a slight change in the regular **SOROSIS** style entails much work. For instance, When a 1½-inch heel is reduced to 1 inch, it does not mean that we simply chop off half an inch of the heel.

Lowering the heel throws the entire weight of the body in a different position and puts a strain on the foot that makes it impossible to wear a shorter-heeled shoe made on the last designed for the higher heel.

We must turn a new pair of lasts, cut a complete set of new linings, both outside and inside, for vamps and uppers—and make the whole shoe a separate work throughout. It is quite an elaborate constructive operation, instead of what seems to many people only a slight change.

BRIDES-TO-BE should bear in mind that: The classic harmony of **SOROSIS** models—The grace and daintiness of their finish—The mellowness of their tone—The subtle delicacy of their lines—The elegance of their adornments—Are the pleasing qualities of **SOROSIS** art.

We urgently invite you to visit our beautiful **SOROSIS ROOM**. It is a Shoe Shop carried to the highest degree of artistic excellence.

You will enjoy buying Shoes under the new system and novel environment.

Everything possible has been done for your comfort, your convenience, your economy. **SOROSIS SERVICE** is incomparable.

They are the shoe marvels of patience, progress and jewel-like precision.

The poetry of Shoes—Boudoir Slippers. Have you seen them? They inspire romantic and sentimental interest. Rosebuds and ribbon, filmy silks and laces were never before so daintily wrought. A bride's dream of beauty. Fleecy as a cloud. Like foam for lightness and delicacy. Art has caught the elusive grace and prettiness of the slipper orchid.

DEBUTANTES will revel among the Evening Slippers. Ingenuity at its charmingest. Tints of flowers, sparkle of jewels, gleam of gold. Not for ascetic, stoic or anchorite. Their butterfly brilliancy is cryptic to them.

Never before were Slippers so subtle, so charming, so exquisitely artistic.

But Fashion is a true daughter of Proteus. It is utterly impossible to describe the Evening Slippers. You must see them.

The new **SOROSIS BOOTS** are as suggestive of Autumn as the russet of oak and the scarlet of maple.

Here's the picture of one. It is photographically accurate—nevertheless it lacks much in conveying an idea of the Boot's beauty. It illustrates form and outline only—but in a flat, mechanical way. You should see the curves and contour of the actual Boot on your foot.

Every bit of the Boot expresses that indescribable quality that for the want of a better word is called "style."

Their tops are the artistic and effective features—made of fine imported cloth loomed of selected fibre for the special purpose—all the attractive putty, mustard and fawn shades in woven colors that will not fade. These **SOROSIS BOOTS** are masterpieces of patience, skill and precision—the price \$7.00—establishes a new precedent for economy.

The cozy-corner for dressing shoes—giving them a mirrorry tan polish; a dull, lustreless black finish glossy as coal, or an old-fashioned brilliant shine—invites you.

The maid's service is yours. No charge. Makes no odds whether you buy shoes here or elsewhere—we'll take care of them free.

Isn't this good, refreshing news?

Every shoe here is brand new—made expressly for us. Different and better than regular stock lines. Even the boxes that hold the shoes are distinctive—heavier, pasteboard—stronger, firmer than the ordinary kind. And the shoes are wrapped in extra sheets of tissue paper. Like other works of art—they are handled with care and tenderness.

"Little details," you say. Yes, they are little details—but it is attention to little details that make for perfection. We have neglected nothing—not even the smallest trifle—to have this the most complete and satisfactory Shoe shop in the world for women and children.

No accumulations of past seasons—

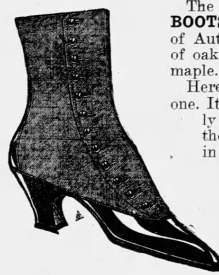

No premiums paid clerks to sell "stickers," because there are no "stickers" and won't be.

An immense variety of styles in all sizes. The most advanced effects—exclusive here because others have not yet had time to copy them.

SOROSIS Shoe Dressings, Polish, Paste, Laces, Trees and the like are the best made.

All of them are manufactured to be sold—not to be given away.

SOROSIS customers had rather pay a fair price for such accessories and secure finest, honest quality than to take home the rubbishy sort free of cost.

Saturday's Football Games Developed Surprises In Several Cases

Football Games Saturday Upset Dope Somewhat

Tech's Showing Against Carolina Satisfactory—Georgia's Work Rather Disappointing—Three Big Eastern Elites Lost—Michigan Showed Up Well

By Inis Brown

Saturday's football games, coming as early in the season as they did, produced some few upsets in the dope. East and south reversals of form were sprung in more than one case. In the local game between Tech and Carolina the Jackets' showing was what was expected of them considering the conditions under which the game was played. No doubt had the contest been played on a dry field the Jackets would have run up two or three more touchdowns. Furthermore, the Smithies were not in to run up the yards as they were. Coach Heston realizes that his boys need a lot of playing and coaching of late and there, and he is trying them out as thoroughly as possible to detect their weak spots.

At Athens, Georgia's showing was a disappointment. The Jackets, who were expected to win, were defeated by the Blue Devils. The game was a close one, with the Jackets leading for most of the afternoon. The game was a close one, with the Jackets leading for most of the afternoon. The game was a close one, with the Jackets leading for most of the afternoon.

Fast Prep. Capt. BY GRANTLAND RICE

VITAL SPOTS IN COMING BATTLES.

They call Connie's big four the \$100,000 infield. No one ever called Stallings' infield by any such financial appellation, but for all that you couldn't purchase his four infielders for \$100,000 to save your blessed neck-piece. Stallings' infield isn't the equal of Mack's but it is a far greater infield than most people have given it credit for being through the waning year.

The Braves four lack the slugging power of the Mackmen; otherwise they are about as good. They embrace no Collins, Baker and Melins on attack. But for defensive play they rival the four stars who have done most to make Athletics history and success said history with purple trimmings and a golden fringe. They will look quite a bit better in this coming series than most of those present believe they will look in comparison.

First we have Stuffy Melins and Butch Schmidt. Butch, physically, is the most powerful man in baseball; one of the most powerful ever played the game. He owns six meat markets in Baltimore that have netted him \$40,000 in the bank with an income of \$8,000 a year—outside of his \$40,000 he might draw for poling two-horse him and such. But beyond all that Butch is one of the best fielding first basemen in either league—a most worthy rival of Stuffy Melins and Jake Daubert. Rubie Vickers played with Butch for three years, and Rubie says that he doesn't recall Schmidt dropping a thrown ball in all that time. "He's as good as Melins or Daubert around that bag," says Rubie, "and that goes all the way."

Schmidt is also a good hitter. He was off to a poor start when the Braves were submerged in the vicinity of the soup trough the first two months, but he has been batting well over .300 since mid-July. His total average runs above .250.

Schmidt, however, is not quite yet a Melins. Stuffy is not only a normal .325 hitter and a great first baseman, but he is a player who has excelled in major league and world series warfare. Stallings says, despite all this dope, that Schmidt will play up to his rival in every department. Next week should furnish the answer.

A second base comparison brings the two greatest of the game together—Eddie Collins and Johnny Evers. Collins is the best second baseman in the game now—if not of all time. He has been hitting around .350 and has pilfered over 60 bases. He has scored 20 more runs than any other man in the game this season. He has no weakness either in courage, brains or skill—speed or power.

Yet Evers is scarce less valuable than Collins. He isn't as good a hitter and he isn't quite as fast. But he is one grand ballplayer—attached to one quickest, keenest brain and hustling for his club, driving his men and keeping them at top speed.

Evers has been hitting around .300 in his greatest years. His fielding has been notably brilliant and his batting has been at .290. So even with Collins to guard the Mackmen will have no great feat at second base.

The meeting of Maranville and Barry brings the two best shortstops of the major leagues together. Among ball players, the award is about 50-50 when these two are mentioned.

While Barry may be a bit keener on the inside game, in no other respect has the crack Philadelphia anything on the Human Rabbit. Maranville has outbatted Barry on the year—has scored more runs—has excelled in major league and world series warfare. Stallings says, despite all this dope, that Maranville will play up to his rival in every department. Next week should furnish the answer.

Maranville will cover a span or two of more ground than Barry, as alert as the Mackian veteran is, Barry has greater experience and the big features of the carnival head.

Frank Baker has quite a bit on Red Smith. Baker is a steeper infielder and a surer, harder hitter. Smith can lay up against the ball, he carries a ringing wallop and poles them on a line, but he isn't a sure thing. Smith, says Stallings, "is just as sure a man in a series of this sort as Baker is. He is a slashing hitter and a man liable to break up any game at any time. Just wait. You'll find that Smith has proven as big a factor in run making as Baker—and I know how good Baker has been."

Boston's infield, defensively, is only a short notch back of the Athletics. But to say that it compares with the Big Four who have been the greatest factors in the game for four years is quite a feat. Stallings' infield will average well above .270 at the bat. This is far enough. But Mack's infield will average above .300, which is something abnormal.

And Mack's infield is also a wonderful machine at defensive play. When Collins and Barry pit their wares against Maranville and Evers, the two greatest second base combinations in baseball will be at work. Evers and Tinker had no chance to face Barry and Collins as Johnny was out with a broken leg. But in Maranville the Trojan has an even more brilliant performer at short than Tinker was—and the defensive play on both sides around second base is sure to be the high spot of the campaign.

When Collins and Barry pit their wares against Maranville and Evers, the two greatest second base combinations in baseball will be at work. Evers and Tinker had no chance to face Barry and Collins as Johnny was out with a broken leg. But in Maranville the Trojan has an even more brilliant performer at short than Tinker was—and the defensive play on both sides around second base is sure to be the high spot of the campaign.

Boston's infield, defensively, is only a short notch back of the Athletics. But to say that it compares with the Big Four who have been the greatest factors in the game for four years is quite a feat. Stallings' infield will average well above .270 at the bat. This is far enough. But Mack's infield will average above .300, which is something abnormal.

And Mack's infield is also a wonderful machine at defensive play. When Collins and Barry pit their wares against Maranville and Evers, the two greatest second base combinations in baseball will be at work. Evers and Tinker had no chance to face Barry and Collins as Johnny was out with a broken leg. But in Maranville the Trojan has an even more brilliant performer at short than Tinker was—and the defensive play on both sides around second base is sure to be the high spot of the campaign.

Fast Prep. Capt.

(Manager, Chicago Federal League Club.)

Former Cub Star, Who is Now Managing Chicago Federals, Says Athletics Have Power and Drive

By JOSEPH B. TINKER.

Philadelphia has the better team in the world's series. Mind you I am not saying the Athletics are the best team in the country. But, compared with the Boston Braves the Athletics are much stronger.

I am saying this, admitting that there are several players on the Boston team I never have seen play and that I have had only a few opportunities to watch either the Athletics or Braves play. But I am confident, from what I know of the men, that the Athletics are better.

Further, I know the two teams man for man in every position the Chicago Federal league team classes well with them and if we could get into the series I would prefer our end of the chances to win that of the Athletics.

However, this is a comparison of the two teams. I know the Athletics well. It is a great team; it is a smart team. I know the Athletics well. It is a great team; it is a smart team. I know the Athletics well. It is a great team; it is a smart team.

Halfback Bell, who leads Gordon's eleven this season, is rated one of the best players in prep circles. He should prove very valuable to the Barnstable team this season, and bids fair to become a college star in the next year or so.
